DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Suzuki.

Suzuki discloses a game apparatus and method for reproducing moving images comprising CD-ROM 10 (recording medium), stream data reproducing apparatus (game) 20, reading processing portion (CD-ROM drive) 27, reproduction processing portion (graphics and sound processors) 23 and 26, and monitoring processing portion (controller) 21 for monitoring reproduction of the stream data. As discussed in column 5 line 61 – column 6 line 58, the controller unit 21 detects when the stream data corresponds to an action (manual input by the player) and notifies the graphics processor of a change in depiction of the moving images. The CD-ROM 10 contains a game program area 22b which specifies the action definition information (instructions for drawing images on the screen). Claims 1, 5-7 are met. Per claim 2, the CD-ROM 10 has movie data 22c (part of the action definition information) that is transferred to the RAM 22 and thereafter used by controller 21 to display images on the screen 30. Regarding claims 3 and 4, the CD-ROM is portable. As to claim 8, the CD-ROM has

Art Unit: 2644

stream data 212b, 212c, action definition information which is transferred to RAM 22 via CD-ROM drive 27. The program area 22b contains the action definition information that specifies when to notify the graphics processor of a change of action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okabe et al, US Patent 6,572,475.
